ACADEMIC POSITION

Postdoctoral Scholar in Finance

2026–present

Owen Graduate School of Management, Vanderbilt University

EDUCATION

Ph.D. in Business Administration (Finance)

2026

Foster School of Business, University of Washington

B.A. and M.A. in Economics (Dual Degree Program)

2017

Boston University

RESEARCH INTERESTS

Household Finance, Labor and Finance, Innovation, and Venture Capital

WORKING PAPERS

End of the Road? Autonomous Vehicles and Displacement Risk [\[SSRN\]](#)

New technologies have renewed concerns about job displacement. In this paper, I link workers' subjective displacement expectations to their direct and social exposure to a disruptive technology: autonomous vehicles (AVs). I find that commercial driver licensing and employment in truck driving fall disproportionately in more AV-exposed areas. The remaining drivers extend their work hours and reduce participation in mortgage markets relative to less-exposed, neighboring drivers. Changes in household spending on alcohol and tobacco products are consistent with heightened automation-induced anxiety. The results indicate that perceived displacement risk affects households' labor supply, credit behavior, and health, all of which could inform welfare assessments and policy responses to automation.

Relief Beliefs: Effects of Anticipated Student Loan Forgiveness (with Xuan Xie) [\[SSRN\]](#)

Political support for student loan forgiveness has been growing, particularly on the left, but evidence regarding its effects remains limited. We evaluate the immediate consumption response to President Biden's 2022 loan forgiveness announcement which promised debt relief of \$10,000 to \$20,000 for approximately 42 million borrowers. We find that retail stores located in counties with a 1 percentage point higher share of eligible student loan borrowers saw a persistent 0.1% increase in weekly sales. The positive spending response was absent in counties with high shares of financially delinquent households, consistent with delinquent borrowers being liquidity constrained and unable to smooth consumption. Novel data on debt relief eligibility and applications suggest that student loan borrowers anticipated relief they ultimately did not receive and adjusted their spending in response.
